

Cambium Networks delivers wireless communications that work for businesses, communities and cities worldwide. Millions of our radios are deployed to connect people, places and things with a unified wireless fabric that spans multiple standards and frequencies of fixed wireless and Wi-Fi, all managed centrally via the cloud. Our multi-gigabit wireless fabric offers a compelling value proposition over traditional fiber and alternative wireless solutions. We work with our Cambium certified ConnectedPartners to deliver purpose-built networks for service provider, enterprise, industrial, and government connectivity solutions in urban, suburban, and rural environments, with wireless that just works.

*Use official description to introduce Cambium Networks. Choose the solutions your company sells to include on your microsite. Link each header to a page that contains the product information for that solution type.*

## POINT-TO-POINT SOLUTIONS

**Demanding Environments Require Solutions that Deliver**  
Cambium Networks proven point-to-point (PTP) series solutions are deployed worldwide, serving highly critical applications in formidable environments for the world's most demanding users. With best-in-class real-world performance and FIPS 140-2 approved security available for government and military applications, the PTP series is your connection to what matters, no matter what.

## POINT-TO-MULTIPOINT SOLUTIONS

**Network Operators All Face Similar Challenges**  
They need to provide a highly reliable service with ever-increasing capacity, serving more subscribers in extremely challenging environments. Operators need the ability to cost-effectively deploy these wireless networks across a wide range of scenarios. To address the multitude of deployment scenarios, frequencies and budgets, Cambium Networks offers purpose-built solutions across three distinct platforms: PMP 450, ePMP™, and cnRanger™ LTE.

## ENTERPRISE WI-FI & SWITCHING

**Optimized for Performance, Security, and Ease of Operation**  
Enterprise Wi-Fi and switching solutions that simply just work—scaling from small offices to the highest-density venues, application-aware to match the needs of your business, and simple to deploy and operate via a cloud-based system—all delivered at a disruptively low total cost of ownership.

## INDUSTRIAL IOT SOLUTIONS

**Industrial Internet of Things (IOT) with cnReach**  
Cambium Networks' IIOT solutions promise delivery of real-time monitoring, measurement, and analytics optimizing performance while establishing sustainable competitive advantage. The cnReach™ platform offers powerful, resilient communications infrastructure that interconnects sensors and controls across large-scale field area networks to transform accumulated and real-time data into insightful knowledge and critical actions.

## VIDEO SURVEILLANCE/ CCTV

**Wherever You Need to Put a Camera, cnVision Makes the Connection**  
cnVision solutions incorporate the latest encryption technologies and security practices. Security cannot be compromised when it comes to backhauling mission-critical video. Adapting to changing environments, cnVision can shift gears just like the transmission in a car to ensure reliable delivery of critical video. cnVision works with all IP cameras in the market. cnVision is simply a transport layer that can provide the necessary bandwidth to transport mission critical video wirelessly.

## ENTERPRISE WI-FI & SWITCHING

### Optimized for Performance, Security, and Ease of Operation

Enterprise Wi-Fi and switching solutions that simply just work—scaling from small offices to the highest-density venues, application-aware to match the needs of your business, and simple to deploy and operate via a cloud-based system—all delivered at a disruptively low total cost of ownership.

### Enterprise-Grade Wi-Fi Access Points

Cambium Networks delivers high-performance Wi-Fi to meet the needs of the most demanding enterprises. Give users consistent, “wired-like” performance plus superior coverage and security depending on your needs—whether from a single, small office network or global, multi-site enterprise networks. Cambium management solutions offer public cloud, private cloud, and on-premises options, all optimized for scalability, zero-touch provisioning and simplified operations.

## WI-FI 6

### XV3-8 Wi-Fi 6 Access Point

The XV3-8 is an enterprise-grade, software-defined access point. High-density architecture reduces the equipment required while leveraging automation to deliver SLA. XV3-8 includes seamless roaming, fast roaming, automatic RF optimization, and interference avoidance to automatically optimize performance to specific local needs. This software-defined 8x8 Multi-Radio access point is equipped with dedicated scanning radio and BLE, WPA3 secure public access, application control, and 802.3bz Ethernet optimized for high-density deployments.

### XV2-2 Wi-Fi 6 Access Point

The XV2-2 is an enterprise-grade, software-defined access point. XV2-2 continues the enterprise network convergence with an edge-intelligent access point managed by application-intelligent Cambium Networks XMS or cnMaestro™ management systems. Choose the management system that best fits your business and use the latest technology from Cambium Networks.
